

We Brighten Your Brands.

Brightening Your Brands from the Beginning.

Founded in 1957 to design and develop high-reliability lighting products, SloanLED® quickly became a pioneer in LED technology. Our founder, Charles Sloan, was driven by two simple principles: employ the latest technologies to develop quality lighting products and take excellent care of our customers.

SloanLED has continued to deliver on these principles as a leading supplier of aircraft indicator lights for the last 60 years, and our commitment to producing safe, reliable, lighting solutions that withstand the elements and harshest weather conditions keeps us at the forefront of the lighting market. Our high-efficiency, long lasting solutions don't just brighten your brands; they represent significant energy cost reductions, maintenance cost savings, easy installation, faster ROI, and deliver exceptional performance with consistent brightness and uniformity.

At SloanLED, it is our

MISSION

to deliver innovative light solutions by anticipating our customer's needs.

By understanding the lighting application, we design, test, and deliver comprehensive solutions that anticipate the customer's total cost of ownership needs and provide a positive experience. We collaborate with our partners to leverage technology, focus on research, and continuously improve our organization, processes, and products.

We are pioneers in applied light technology solutions; with a

VISION

of enlightening the world.

"A brand is a living entity, and it is enriched or undermined cumulatively over time—the product of a thousand small gestures."

~ Michael Eisner

Your brand is a story that is always being told.

You've built a brand your customers trust. Managing each detail of your brand is imperative to maintaining a consistent experience from one location to the next, and SloanLED has expertise in the details of light. It takes accurate color, and the best level of illumination for each application to brighten your brand in every sense of the word.

The SloanLED difference:

Successful relationships are built and maintained on trust and reliability. From innovative lighting solutions and quality products to industry-leading customer care and layout services, we're your partner every step of the way.

- 60 years of lighting excellence
- National program specification expertise
- Industry leading product line and technical support
- Quick turnaround layout and photometric services
- More than 15 million meters of product sold
- 1,000,000+ signs supplied with SloanLED power

"MODW units meet SloanLED's stringent design criteria and outperformed the competition, making them best-in-class."

~ Elmer Tolentino Jr., CRE, Principal Reliability Engineer, Reliant Labs

We know a thing or two about lighting.

SloanLED high-efficiency, long lasting solutions don't just light your signs, canopies, shelves, and refrigerated displays, they represent significant energy and maintenance cost savings, easy installation, and faster ROI. We deliver exceptional performance with consistent brightness and uniformity in all applications.

There's more to light than the opposite of dark.

Light is more than just "white" and understanding how to properly utilize an LED is essential to obtaining the results you need. Our lighting experts have the experience and training to ensure your brand is represented exactly the way you want it.

Squared Up

Project:

Microsoft Theater and Microsoft Square rebranding

Location:

Los Angeles, CA

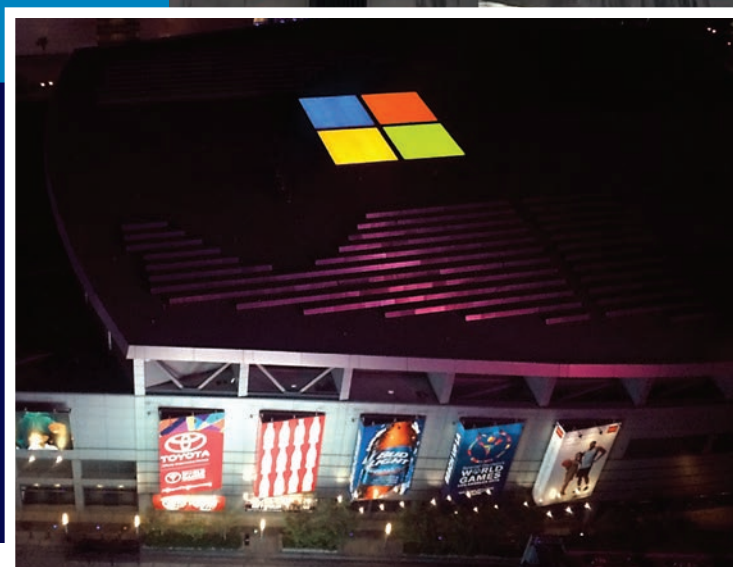

The need:

When Microsoft acquired Nokia in 2014, the former Nokia Theatre had to be rebranded to Microsoft Theatre and Microsoft Square. This called for a major signage overhaul including lighting and ensuring the color accuracy of what would be the largest Microsoft logo in existence.

The solution:

SloanLED V180 Large – SloanLED not only illuminated the massive 15 m × 15 m per square light box rooftop logo at a total of 3,050 square meters (or roughly 3.5 tennis courts), but the wall signs and letter sets as well which varied in size from 914 mm to 1,854 mm.

With so much footage of LED lighting needed to complete this rebranding project, one might assume the LED module count and energy costs would be astronomical; however, the SloanLED V180 Large is unique in that it provides a 180 degree overall viewing angle. The result was brilliant, evenly illuminated signs using fewer modules, and lower installation and operating costs for Microsoft.

Nick at Night

Project:
Nickelodeon Studios

Location:
Burbank,
California

The need:
Five-sided channel letter illumination,
providing a 3D look, to the main signage
at the Nickelodeon Studios complex.

The solution:
SloanLED V180 – Bright, uniform, and most
importantly, efficient illumination of the main
signage at the state-of-the-art, sustainable complex,
which will attempt to get LEED Gold Certification.

Project:
"Rock 'n Roll Lightboxes" for First Direct Arena

Location:
Leeds, UK

The need:
Illuminate two large-format lightboxes,
showcasing 240 album covers of famous artists
that have played at the venue.

The solution:
PosterBOX 3 – 90 modules for the entire system
that draws just over 1,200 W, achieving bright,
even illumination across a width of 3 meters.

Bright Lights, Hollywood Nights

Project:

Viacom west coast headquarters

Location:

Hollywood, California

The need:

Illuminate two, massive 10-foot high channel letter signs, facing north and south, atop Viacom's new west coast headquarters in Hollywood's Columbia Square.

The solution:

Beautiful, uniform illumination of both Viacom signs was achieved with 398 SloanLED Prism 6500 K modules, and today, the Viacom headquarters shines as a beacon for what has been hailed as the biggest media tenant arriving in Hollywood since the Capitol Records tower was built in the mid-1950s.

Brilliance by Design

Project:

United Petroleum service station

Location:

Victoria, Australia

The need:

The massive scale of the canopy and dizzying nine meter height required a canopy lighting solution that would compliment the station's unique design while providing the bright, even illumination, and high efficacy SloanLED lighting solutions are known for.

The solution:

PDL3 and PML2A – The slim, compact design of the PDL3 allowed each luminaire to be wrapped with custom designed outdoor vinyl, while the legendary SloanLED light engine provided an average of 290 lux on the ground at each pump. Even with 37 luminaires installed, power consumption remained low at only 4,625 watts. Seven PML2A pole mount lights provided a beautiful, efficient solution to increase visibility over the entire site.
